

Dear Bob,

We would like to thank you for assisting us by producing our zinc die casting parts. A couple of years ago when we were developing our Turbo Drywall Sander, you came through to us with a great solution and have consistently produced parts for my company ever since and with lead times in less than six weeks. Kinetic Die Casting Company produced tooling inexpensively in 2000, so we can get started producing our products. My requirements are not very large, about 1000 to 1500 each year (which I hope to change) and your pricing has been very good. There are many competitors in the market and it was a decision of either taking the product overseas or going local and I am glad the decision to stay in the country has turned out so well for us. Thank you Kinetic Die Casting Company.
