6918 Beck Ave.  
North Hollywood, CA 91605

Dear Bob,

This letter is to thank you for your support and cooperation. During our recent new product project (950 Backcap), Kinetic Die Casting was extremely helpful in accelerating the tooling and delivery. You were able to assist me to fine tune the design to make the part more manufacturable, and with less problems. You were quick to deliver pre-production samples for approval and delivered a casting on time and with outstanding quality.

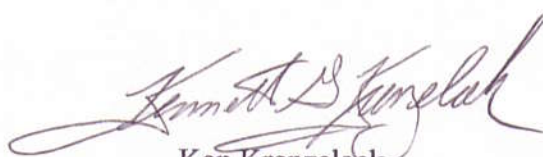

You were also very helpful in identifying various different finish possibilities, and the first one you recommended is the one we ended up using. When I took the casting to several of my finishers, they remarked about the unusual high quality of the casting.

Thank you for your help during this project. I look forward to further projects with Kinetic Die Casting.

Sincerely,

Don Scott  
Director of Manufacturing
